- Resource-Based
- Representation

RESTful Pattern

- GET /users/:id
- POST /users
- PATCH /users/:id
- DELETE /users/:id
- PUT /users/:id

Task	Method	Path
Create a new task	POST	/tasks
Delete an existing task	DELETE	/tasks/{id}
Get a specific task	GET	/tasks/{id}
Search for tasks	GET	/tasks

Talk is cheap. Show me the code.

Re-Inventing the API Client

Bruno is a Git-integrated, fully offline, and open-source API client

Developer First

Open-source community and extensibility are our cornerstones. We're proud to be an API-client and commit to not bloating our product with unnecessary 'platform' features.

Native Git Integration

Collaboration requires context and a shared location. Collections can live directly in your Git provider so they're always versioned.

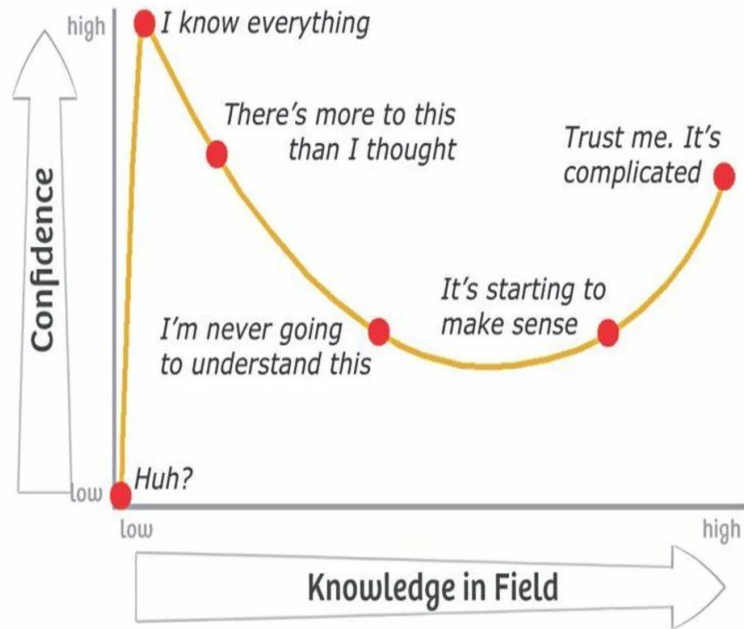

Offline only

We take security and privacy seriously. Bruno is an offline tool and there is no syncing of your data to any cloud.

وقد قال الشعبي :
(العلم ثلاثة أشبار :
فمن نال منه شبرا .. شمخ بأنفه ،
ووكهن أنه ناله ،
ومن نال الشبر الثاني .. صغرت
إليه نفسه ، وعلم أنه ما ناله ،
وأما الشبر الثالث .. فهيماق ،
لا يناله أحد أبدا) .
